MOVE MORE WITH LESS

Bridgestone exists to provide social and customer value as a sustainable solutions company. Our Mining Solutions aim to co-create future innovations for our customers helping them amplify value.

Surface Mining operations are rugged. Even an average day on the site can be hard on equipment. That's why having the proper equipment –and tires– that excel even in harsh conditions is crucial. Bridgestone and Firestone OTR tires use innovative technology to deliver durable products with enhanced performance to keep your site operating at peak performance.

Our lineup of surface mining tires is designed to keep operators safe and equipment operating properly while meeting the harsh jobsite demands. From delivering high-quality application-specific tires to provide routine maintenance and site studies, Bridgestone offers everything you need to maximize your operations.

TRANSFER YOUR HEAVIEST LOADS WITH GREATER EFFICIENCY

Rigid Dump Trucks | Haul Trucks

Transporting bulk materials from one place to another requires the right heavy equipment fitted with the proper tires to help maximize productivity and reduce operational costs. Rigid dump trucks are steered by their tires, which makes them better suited for larger jobsites with well-maintained haul roads. Designed with exceptional tread wear and high resistance to chipping, cuts and heat, Bridgestone tires help you take on heavy lifts in mines and quarries providing longer tire life.

Bridgestone MasterCore is the latest mining tire, designed with smart technology inside for hard work outside. Innovative core technology and proprietary design improvements allow these tires to work overtime for enhanced performance.

The tires you choose make every difference in your efficiency. Bridgestone's mining tires for Rigid Dump and Haul Truck applications allow you to transport large volumes of loads or bulk materials with increased ease. The result?

Move More With Less.

AMPLIFY YOUR PRODUCTIVITY WITH ADVANCED DURABILITY

Loader/Dozer

When moving material from point A to point B with a loader, you need to consider travel distance, speed and surface conditions. Selecting the right tires will help you to reduce operational costs and extend tire life. Our loader tires provide robust support for pushing, digging, excavating and leveling materials like rock, coal, ore and other minerals. Loader tires offer durability and high traction for efficiently scooping and transporting heavy loads and can travel as little as 500 feet to over 2,000 feet, depending on the job requirements.

No matter the task at hand, Bridgestone's range of loader tires, featuring wear-resistant compounds and puncture-resistant tread designs, bring optimal performance tailored to the specific machine and job requirements. We're also the creators of one of the biggest bias tires in the world, the Firestone SRG DT LD 2. This tire delivers 31% longer tire life¹, and 90% reduced tramming time in long distance².

With various tire treads, compounds and sizes available, Bridgestone experts can help you find the right tire for your loader or dozer. Ready to take on more jobs in less time? Bridgestone loader tires are designed to help optimize your machine's performance, increase comfort for your operators, and handle the most challenging terrains with proven productivity.

FIRESTONE
SRG DT LD 2 70/70-57

1. Performance comparison based on Firestone 70/70-57 SRG DT LD (previous specifications) at major iron mine in Brazil on # hours operating on average. Actual results may vary by site.

2. Data based on tech bulletin BATO-OTR-TB-006-240409. Released on April 2024, data captured by ATC on Firestone 70/70-57 SRG DT LD 2 loader running at 7.5MPH for 40 minutes then 2MPH for 290 Minutes, vs previous Firestone 70/70-57 generation running 5 Miles maximum per day Technical bulletin BATO-OTR-TB-002-160719.

EFFICIENCY AND EXTENSION

Bridgestone MasterCore, the latest mining tire, is designed with smart technology inside for hard work outside. The innovative core technology and proprietary design improvements allow these tires to work overtime for enhanced performance. With increased flexibility as compared to conventional product, these tires can be customized to help meet the needs of any site so you can run your mines more efficiently, with greater productivity.

INNOVATION IS AT THE CORE

1] BONDING AGENT OPTIMIZED

Proprietary process applies bonding agent to the steel cord for improved rubber coverage and adhesion.

2] ANTI-RUST STEEL CORD

Anti-rust steel cord helps improve resistance to rust and damaged belts from cuts and moisture exposure.

3] NEW RUBBER COMPOUND

New rubber compound for belt skim and wedges helps improve crack propagation by 20%, resulting in improved belt & casing.

DESIGNED TO ADAPT TO YOUR MINESITE

Discover up to **5% more durability**, **10% faster speeds**, or **15% greater payloads**. MasterCore's flexibility is made possible by new compounds and a revolutionary steel cord with new anti-rust and adhesion coatings.

OR

OR

5%
IMPROVED DURABILITY
Extend tire life with decreased crack propagation and greater cut resistance.

10%
INCREASED SPEED
Run faster with a tire that can handle higher speeds and hotter temperatures.

15%
INCREASED TIRE LOAD CAPACITY
Hold more payload, or reduce inflation for better traction

BRIDGESTONE

Mining Solutions

Bridgestone iTrack

Bridgestone's Subscription-Based Next Generation Mining Monitoring System delivers real-time temperature, pressure and vehicle analytics to help you **move more with less**.

Bridgestone iTrack SPECIALIZED FEATURES

ACCELEROMETER

- Detects excessive force
- Analyzes operator performance
- Assess haul road conditions

GEOFENCING

- Measures time spent in specific zones
- Monitors overall site productivity
- Improves safety

TPMS

- Early detection of pressure loss and excessive heat
- Increases fuel efficiency
- Improves tire performance
- Helps reduce downtime

INTEGRATION

- Native integration with Bridgestone Tire Management Systems (Toolbox)
- Easily integrate to existing systems through API
- Interface with Mine Control Center
- Connects from any mobile device or computer

GPS

- Measures cycle times
- Analyzes data for recommended speed limits
- Locates equipment around your site
- Route severity ranking

ANALYTICS

- Provides real-time data
- Instant reporting with live monitoring
- Standard and customized reporting
- Metrics (KPIs) to promote safety and efficiency

"Best-In-Class Service" is based on the largest number of dealers in the commercial tire dealer network in U.S. found on zenrade.kz. As compared to the 2022 U.S. Replacement and Retreaded medium/heavy truck tire brands with similar market share as listed in the January 2023 Modern Tire Dealer (page 34).

BRIDGESTONE
Solutions for your journey

Tire Management Systems

A globally integrated technology to enhance your total tire and rim life cycle management.

Bridgestone offers an off-the-road tire and rim solution that helps customers manage the life cycle cost of tires for increased efficiency and profitability.

Functionality for Success

Monitor each tire and rim's receiving inventory, mounting, inspections, rotation, repairs, retreads and regrooves—all the way to disposal. It leverages integration to real time data; such as our partnered TPMS (Tire Pressure Monitoring System), weather API's and more, to further enrich the quality of your data to use with tires.

Comprehensive and Intuitive Reporting

Help maximize tread utilization, manage inventory, improve safety and minimize expenses across your entire organization. It's a powerful predictive analytics platform that places immediate, actionable reports for browser or mobile use.

BRIDGESTONE
Solutions for your journey

High performance products matter. A partnership that helps you move more? That's what really matters.

At Bridgestone, our goal, as a sustainable solutions company, is to cocreate with our customers to amplify value through our products, solutions, and expertise that help deliver our business aspirations.

We know that productivity is tied directly to the dependability of your tires. That's why we're committed to arming you with solutions that keep you moving forward. Bridgestone Engineering Solutions offers expert field engineers that partner with you to optimize your tires. As a customer you get multiple solution offerings designed to help you move more with less.

Learn about all of the engineering solutions
Bridgestone Off the Road offers.

BRIDGESTONE
Solutions for your journey

Take the uncertainty out of tire management.

SITE & EQUIPMENT ASSESSMENT & CONSULTING

Leveraging our expertise beyond tires, Bridgestone field engineers are prepared to help identify opportunities to enhance surface and road conditions plus equipment maintenance.

IN-SERVICE & OUT-OF-SERVICE TIRE INSPECTIONS

By analyzing the pressure, wear patterns and tread depth, our field engineers can proactively identify operational conditions impacting tire life.

HEAT STUDIES

Learn how operating conditions and equipment usage could be leading to excess heat that negatively impacts tire life. Plus, correlate heat to TPMS and optimize alarm levels to help improve productivity.

WEIGHT STUDIES¹

Find the optimal payload weight to help reduce excess hauling cycles without overloading your tires and leading to premature removal. Plus, our team can calibrate on-site equipment to better ensure accurate analytics that impact performance.

GPS ASSESSMENT & TMPH/TKPH CALCULATION

With insight into the haul patterns and speed as well as the load and distance requirements of your operation, engineers can recommend the optimal tire pattern and compound combination for your site.

G-FORCE STUDIES

Help improve uptime and maximize productivity with site-specific assessments of the G-Force exerted during operation that can negatively impact tire performance.

DRONE SURVEYS

Understand your site operations in real time with image and video captures via drone. Aerial photography gives us the ability to monitor site performance without impacting productivity.

DATA ANALYSIS & REPORTING

Combining the power of tire and fleet management systems, dispatch, TPMS and vehicle data, our data analysis tools can give you a comprehensive evaluation of your operation, leading to proactive decision making and moving more.

MARKET PERFORMANCE & INSIGHTS

Our design and engineering teams leverage market insights and performance data to improve future products.

BRIDGESTONE OFF-THE-ROAD SOLUTIONS

Intelligent Products

The Bridgestone Off-The-Road lineup offers innovative tread patterns and compounds designed for various surfaces and applications, providing reliable performance so customers can maximize jobsite productivity.

Integrated Technologies

Bridgestone Mining Solutions provides customers data-driven technologies to help manage their life-cycle assets, get real-time pressure and temperature insights to help reduce downtime, optimize total cost of ownership, and maximize productivity.

Bridgestone iTrack

Bridgestone iTrack provides heat, pressure, acceleration data and more, allowing your fleet to run at optimal operational production across the entire mine, maximizing the life of your haulage assets.

Tire Management Systems

Bridgestone offers Off-The-Road Tire Management Systems that allow fleets to make informed decisions and help manage the life cycle of tires for increased efficiency and profitability. Monitoring each tire from receiving inventory, mounting inspections, rotation, repairs and removals—no matter the size of your fleet, anywhere in the world.

Best-in-class Service

We know that the best products and technologies only stay the best when paired with best-in-class service⁴. Our extensive dealer network, comprehensive training programs, and highly qualified field engineers help improve downtime, so our Off-The-Road customers can focus on maximizing their productivity.
